USB Edition for Windows

A. How to INSTALL on a USB Stick:

1. Plug a USB stick into a USB slot on your computer.

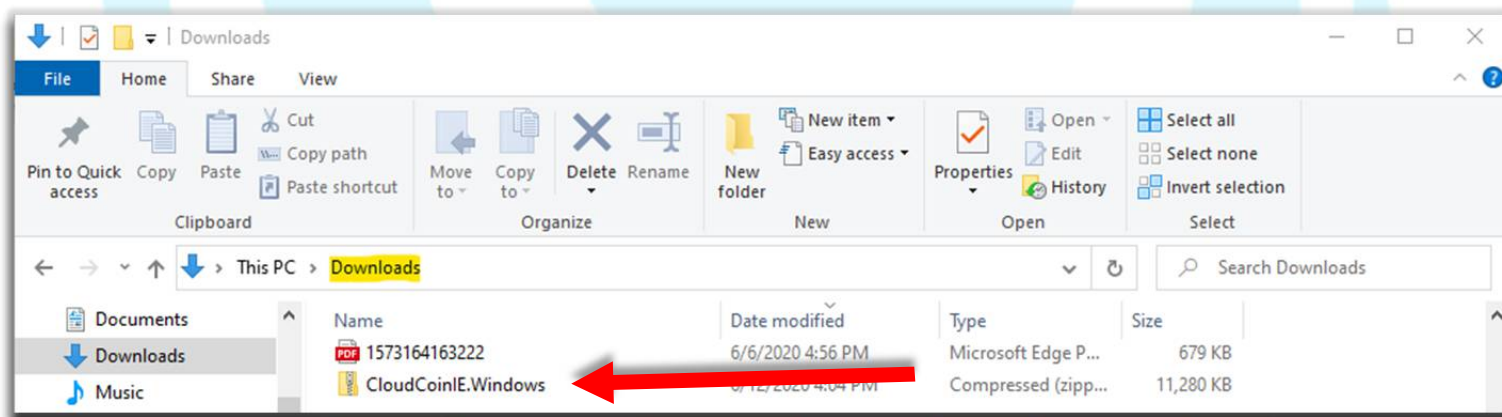

2. Download the CloudCoin USB Edition.

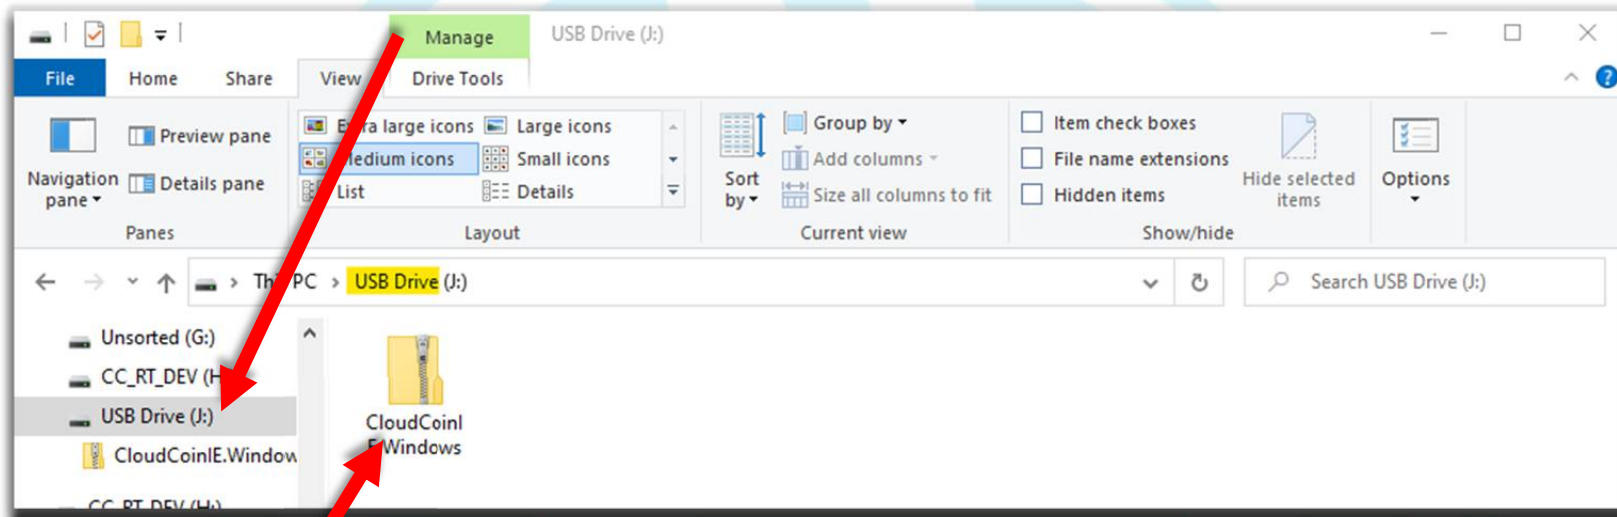

<https://cloudcoinconsortium.com/use.html>

3. This download will be a zipped (compressed) folder. It should arrive in your Downloads folder.

4. Open an explorer window and find the CloudCoinIE.Windows download.

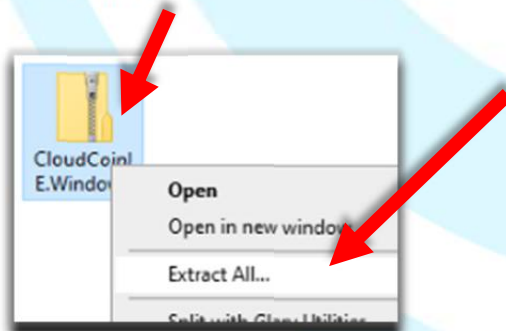

5. Open another explorer window. In the list of storage drives, find and open your USB stick.

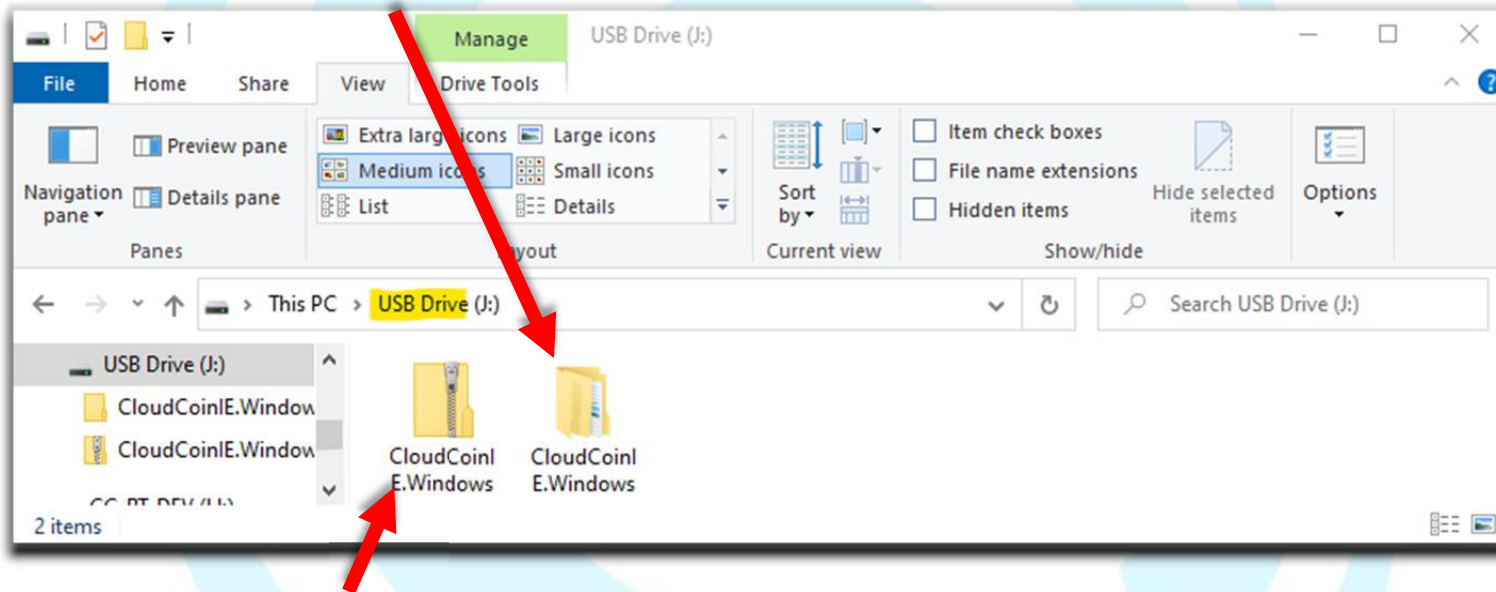

6. Drag and drop to copy the zipped folder from your Downloads folder to the USB stick.

7. On the USB stick, right click on the zipped folder and select Extract all.

8. A folder will appear on your USB also named CloudCoinIE.Windows which contains your USB Edition

9. You will not need to extract from the zipped folder again for this installation.

USB Edition for Windows

B. How to RUN the CloudCoin USB Edition:

1. Double click on the CloudCoinE.Windows folder. You will see another folder inside named release.

2. Double click the release folder.
3. Here you will see a list of program files. Find the CloudCoinIE application.
4. Right click on it and select run as administrator. You may need to type your computer's admin password at this time.
5. The program will start.

C. Using CloudCoin USB Edition:

Click on each function in the top bar to use.

1. Bank shows inventory, the count of each denomination and the total number of CloudCoins.

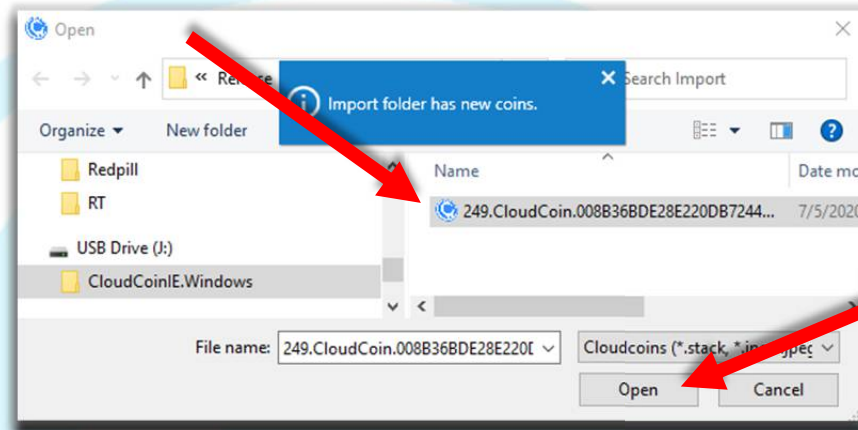

A screenshot of the "BANK DETAILS" window. It features a table with three columns: "Denomination", "Count", and "Total". The data is as follows:

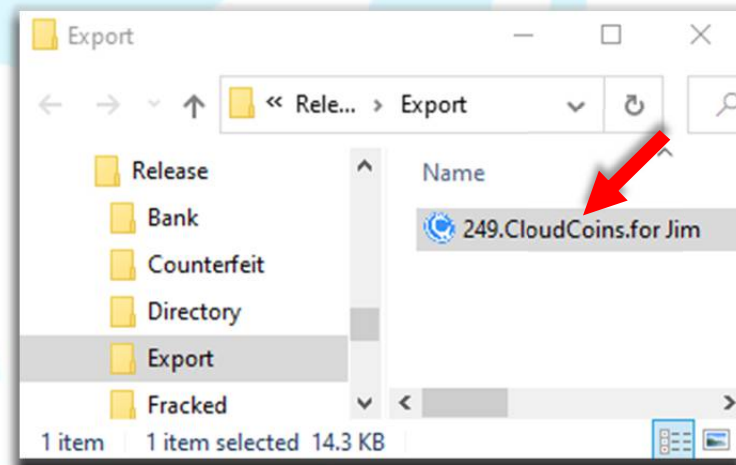

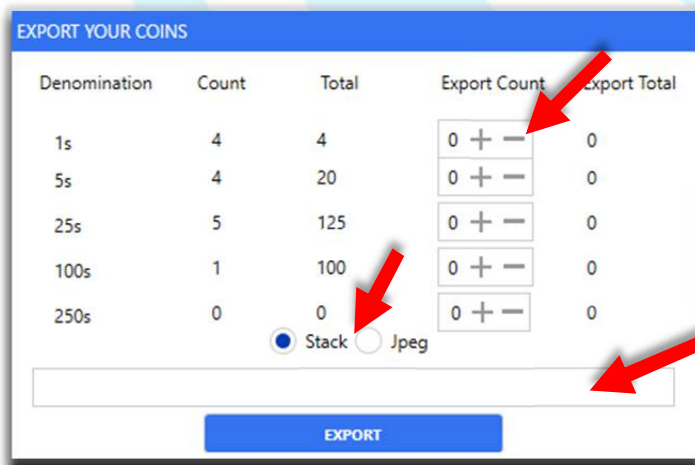

Denomination	Count	Total
1s	4	4
5s	4	20
25s	5	125
100s	1	100
250s	0	0
Total	14	249

2. Import. Clicking the import button opens the import folder. Drag and drop CloudCoins to the import folder that you want to pown and add to your bank. Click open. The powning and deposit process will start. Import will leave the old copy of the coins in their original folder. The old copy will become counterfeit, because the new copy has been pown and is in the bank.

USB Edition for Windows

4. RAID check the RAID before importing CloudCoins to confirm that the network is ready to use. They should all be green. If more than three are not green, it will not be safe to pown your CloudCoins. Click refresh to check again.

5. Tools to create backups of your CloudCoins, Show folders, and change working directory (not recommended for new users).

- Create a backup makes a backup copy of the authentic CloudCoins in your bank. Backups can be saved to another USB or saved to your computer or another location.
- Show folders opens the location of the CloudCoin folders on you USB stick.
- Change working directory (not recommended for beginners).
