Windows Installer Instructions

Updated July 2020

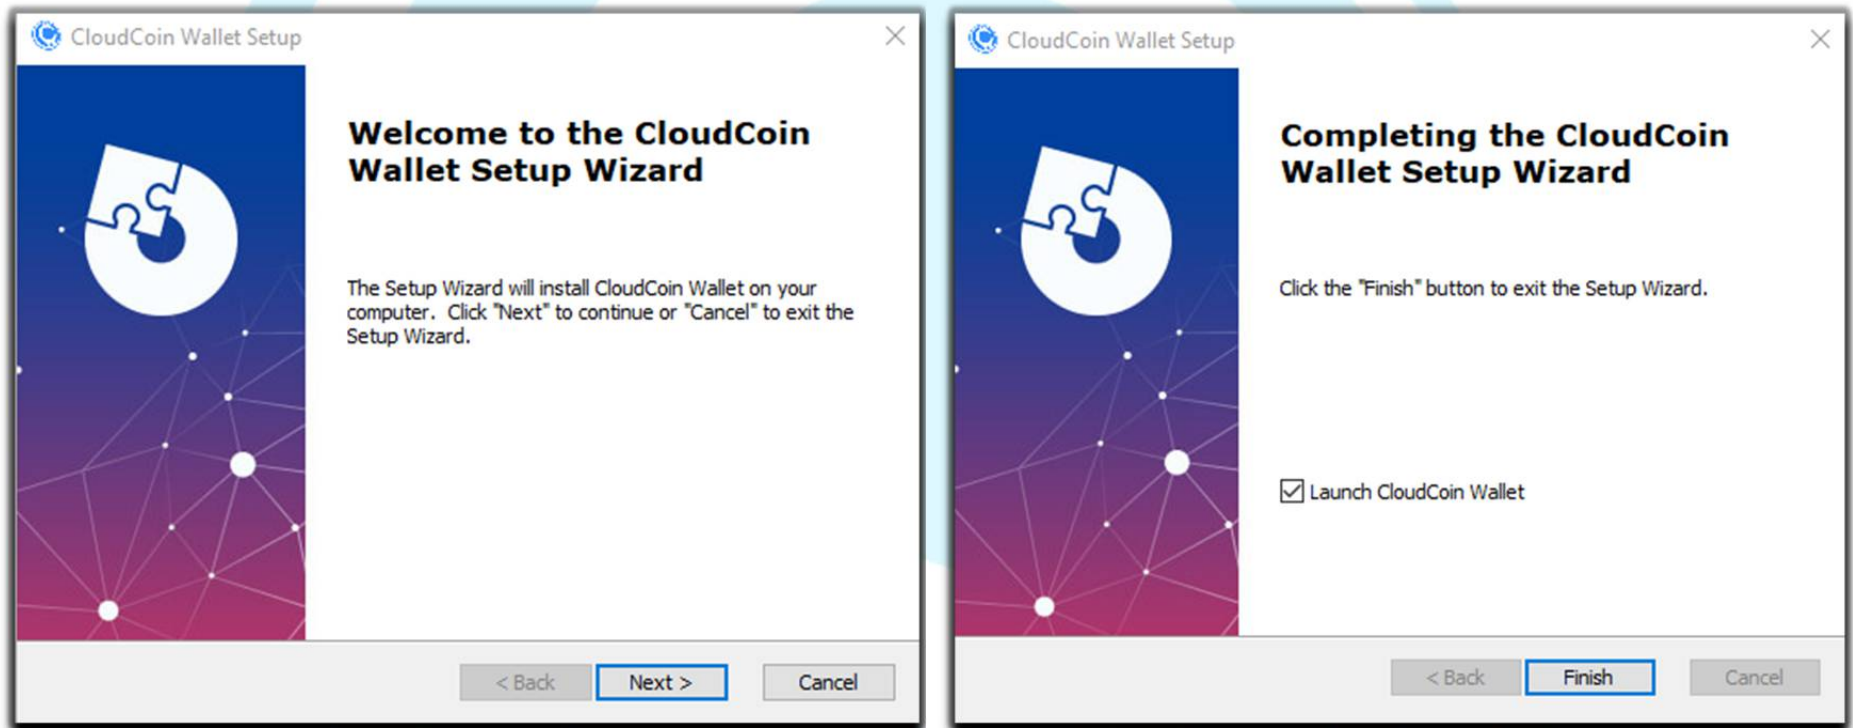

INSTALL CloudCoin Wallet (Windows installer version)

- Save the installer to your Windows computer.
- The file may end up in your downloads folder.
- Click the downloaded file to start the installer.

- Since this app is not from the Windows store you need to click More info then Run Anyway.

- The Coin Wallet Setup Wizard will begin. Follow the instructions in the Setup Wizard.
- You can permit the Setup Wizard to create a shortcut on your desktop if you desire.

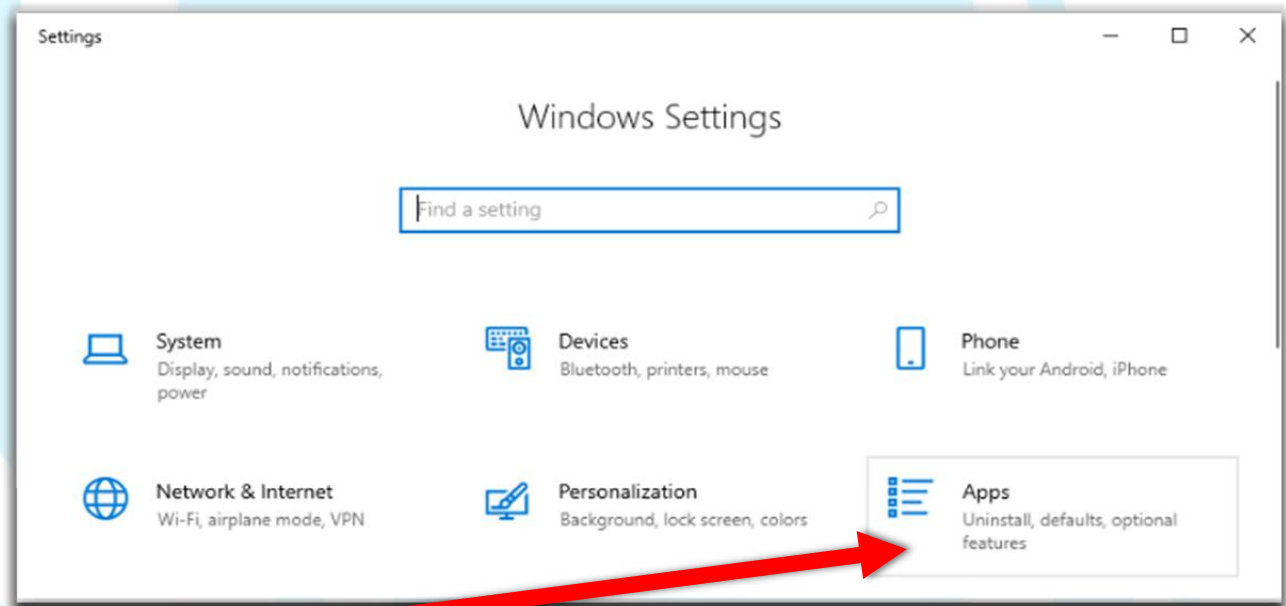

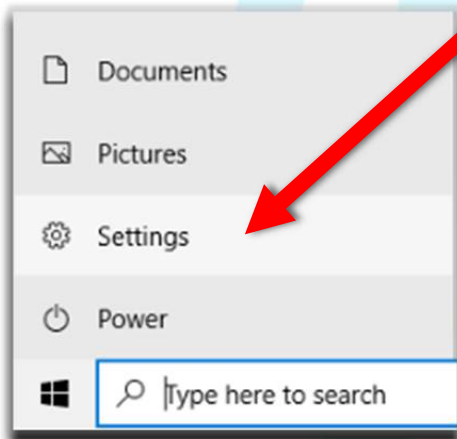

- After you finish the Setup Wizard, you may be prompted to enter your computer's administrator password. Do so if required and continue.
- Start CloudCoin Wallet. Download the CloudCoin Wallet instructions if you do not have them.

UNINSTALL CloudCoin Wallet (Windows installer version)

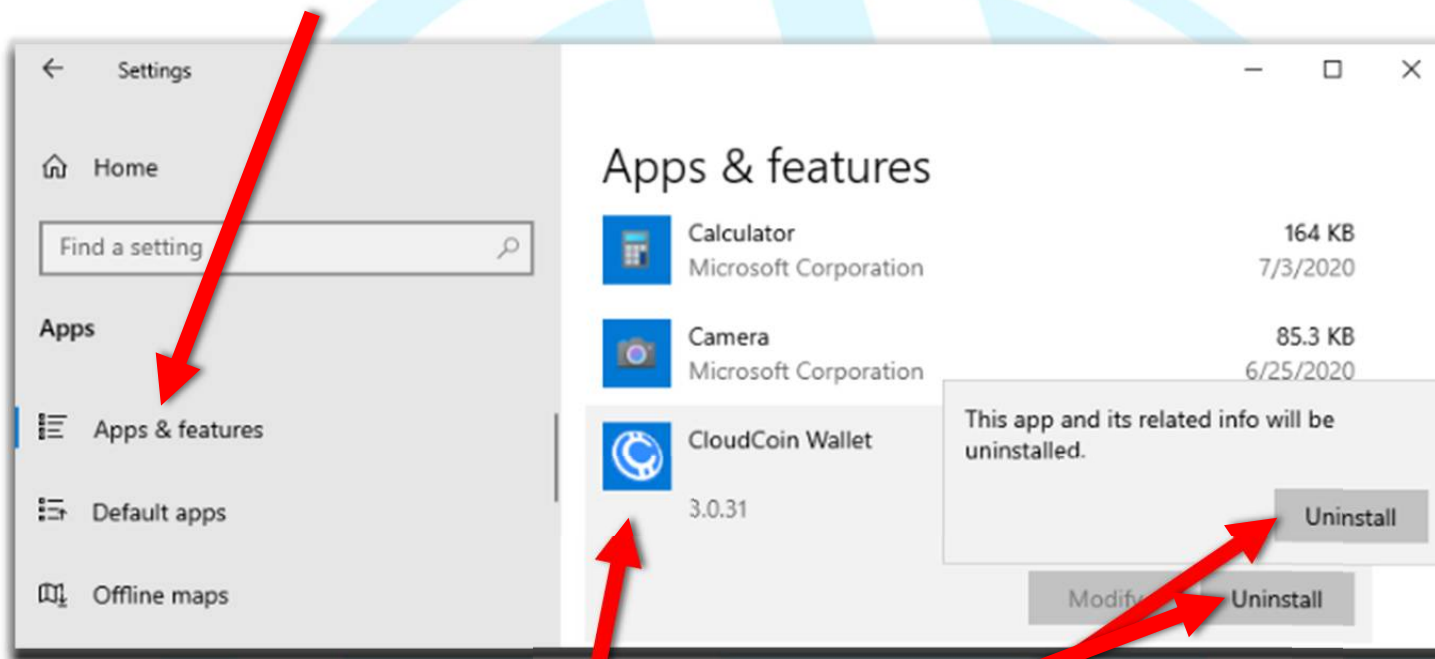

Uninstall will not remove your CloudCoins or Wallet folders. Those folders hold your CloudCoins. Uninstall will only remove the program files. Your CloudCoins will be untouched.

- If you do not intend to use CloudCoin Wallet, withdraw all Coins you have stored in your Wallets and move them to a safe location such as a USB stick or online encrypted storage such as SecureSafe.com.
- Right, click the Start Menu  on your desktop.
- In the pop-up list, click Settings.

- Click Apps.

- Click Apps & features.

- Locate and click CloudCoin Wallet in the list.
- Click Uninstall. Click Uninstall again.
- For uninstall to complete, you may need to enter your computer's administrator password.
- CloudCoin Wallet app will be uninstalled leaving your CloudCoins and Wallet folders intact.

Now you can install a CloudCoin Wallet app update. Follow steps on pages 2 and 3 above, if needed.
